Proc#: ZZ026 Test Form: 02F
 Grade: 8 Test Date: 11/19/16
 Section: Run Date: 11/07/17

The student's performance is shown at the right by various normative scores which may be interpreted in the conventional manner. Thus, a national percentile rank of 65 (which would be located in the NP column) would indicate that the student's test score exceeded 65 percent of those in a national normative population.

The student's national percentile scores are also illustrated in the graph by a band of marks which show the range in which the student's actual score likely falls. For most uses, performance may be judged by noting the rating column in which a band occurs. The High, Average, and Low ratings represent the highest 10%, middle one-third, and lowest 10% respectively. Above Average represents the upper one-third (excluding the highest 10%) while Below Average represents the lower one-third (excluding the lowest 10%).

Performance in specific skills areas of each subtest is reported below by the number of items correctly answered and a performance rating. The ratings are norm-referenced and have the same meaning as the performance ratings in the graph above.
