The student's performance is shown at the left by various normative scores. National percentile ranks compare this student's performance to students in the same grade of the national normative group. For example, an NP of 65 would mean that the student's test score exceeded 65 percent of students' scores in a national normative population.

The student's national percentile scores are also illustrated in the graph by a band of marks which show the range in which the student's actual score likely falls. For most uses, performance may be judged by noting the rating column in which a band occurs. The High, Average, and Low ratings represent the highest 10%, middle one-third, and lowest 10% respectively. Above Average represents the upper one-third (excluding the highest 10%) while Below Average represents the lower one-third (excluding the lowest 10%).

Performance in specific skills areas of each subtest is reported below by the number of items correctly answered and a performance rating. The ratings are norm-referenced and have the same meaning as the performance ratings in the graph above.
